## PROFESSIONAL SUMMARY

HR Assistant with hands-on experience configuring and troubleshooting payroll systems (Odoo HR/Payroll) alongside full-cycle HR operations — onboarding, offboarding, leave administration, recruitment coordination, and statutory compliance under UAE Labour Law. Diagnoses and resolves payroll computation errors, salary rule logic issues, and attendance/WPS data discrepancies, working directly with system configuration rather than only its outputs. Completing a dual-specialization MBA in HR Management and Operations Management. Seeking an HR Coordinator / HR Systems role where HR operations expertise and payroll systems troubleshooting can add immediate value.

## CORE COMPETENCIES

HRIS & Payroll Systems (Odoo) • Payroll Configuration & Troubleshooting • Salary Rules & Computation Logic • WPS Reconciliation • Attendance Management • Employee Lifecycle Management • Recruitment Coordination • Leave Administration • UAE Labour Law Compliance • Gratuity & Final Settlement Processing • HR Documentation • ATS Systems • HR Reporting & Analytics • Power BI

## PROFESSIONAL EXPERIENCE

### HR Assistant

Sep 2025 – Present

Sky Contracting & General Maintenance LLC | Ajman, UAE

- Manage end-to-end HR operations — onboarding, offboarding, employment contracts, visa documentation, and personnel records — in compliance with UAE Labour Law.
- Coordinate full-cycle recruitment for finance and administrative roles: drafting job descriptions, screening candidates, and designing structured interview evaluation forms.
- Diagnose and resolve Odoo payroll discrepancies — including overtime input mismatches, salary rule computation errors, and payslip-vs-PDF inconsistencies — tracing root causes to stale recompute states and rule logic, restoring accurate payroll for the full workforce.
- Reconcile Odoo payroll output against WPS files across Ajman, Sharjah, and cash payment streams, ensuring salary disbursements match statutory wage protection requirements.
- Built and corrected a monthly attendance import covering 33 employees, resolving import conflicts and special leave cases to keep attendance records audit-ready.
- Prepare final settlement documentation and gratuity calculations for departing employees per UAE Federal Decree-Law No. 33 of 2021, for management review and approval.
- Maintain and audit HRIS records, generate HR metrics reports, and support internal compliance reviews and policy implementation.
- Liaise with insurance agents and government platforms (RTA) to manage company vehicle insurance renewals, coordinating approvals across departments.

### Fiber Optic Technician

Apr 2022 – Aug 2025

Build Max Technical Service | Ajman, UAE

- Maintained and upgraded fiber optic infrastructure, reducing network downtime by 40% through proactive monitoring and preventive maintenance.
- Coordinated installation and fault-resolution schedules with clients and internal teams, improving network reliability by 30%.
- Diagnosed and resolved network faults using structured troubleshooting methods, minimizing service disruption for clients.
- Maintained detailed service and maintenance logs, supporting accurate reporting and handover between shifts and teams.

## PROFESSIONAL EXPERIENCE

---

### Quality Engineer

Jun 2018 – Feb 2022

Power Spack Automotive Pvt Ltd | Chennai, India

- Implemented quality control protocols across the production line, reducing product defects by 70% and improving customer satisfaction.
- Conducted root-cause analysis and corrective actions, strengthening compliance with automotive quality standards.
- Trained production staff on quality standards and inspection procedures, embedding consistent practices across shifts.
- Coordinated with cross-functional teams during internal and customer audits, ensuring documentation readiness and timely closure of findings.

### Development Engineer

Jun 2016 – Jun 2018

TI Metal Forming | Chennai, India

- Designed and optimized metal forming processes, improving production efficiency by 10% and product quality by 30%.
- Led cross-functional collaboration to engineer manufacturing solutions, reducing cycle times and material waste.
- Prepared technical documentation and process specifications, supporting knowledge transfer and consistent production standards.
